## Experience

<b>Axilivo Technologies Pvt. Ltd.</b> Intern <a href="https://www.axilivo.com/">https://www.axilivo.com/</a>	Bikaner, Rajasthan October 2025 - Present
--	--

## Education

<b>Shri Jain P.G. College</b> B.Com (Bachelor of Commerce)	Bachelor's Degree • 76 % March 2024-Present
<b>Seth Tolaram Bafna Academy</b> Commerce	Higher Secondary Education / Schooling • 79 % 2017 – 2019

## Projects

<b>Punchdesk Project</b> Developed <b>PunchDesk</b> , a production-ready attendance management backend using <b>Flask</b> and <b>SQLAlchemy</b> . Implemented <b>JWT-based authentication</b> , multi-role authorization, <b>mobile &amp; biometric device attendance flows</b> , centralized exception handling, and clean service-layer architecture. Focused on scalability, maintainability, and consistent API response standards.	October 2025 – Present
--	------------------------

<b>Archery Management System</b> Developed a full-stack web platform to manage archery students, performance records, and multi-city championships. Implemented student enrollment, score tracking, match scheduling, and leaderboard modules using Python, Flask, MySQL, and responsive web UI. Enabled role-based access for admins, coaches, and students, streamlining tournament operations and athlete performance analysis.	
---	--

<b>AI PDF Chat Assistant</b> Built an AI-powered web application that allows users to <b>upload PDFs and interact with them via intelligent Q&amp;A and summaries</b> . Implemented PDF text extraction, chunking, vector embeddings, and semantic search using <b>Python, Flask, Gemini LLM, and vector databases</b> , enabling accurate, context-aware responses strictly based on document content. <a href="https://pdf-chat-assistent.vercel.app/">https://pdf-chat-assistent.vercel.app/</a>	
---	--

<b>AI Resume Analyzer</b> Built an AI-powered web application that analyzes resumes to provide smart feedback on skills, keywords, and ATS compatibility. Implemented resume parsing, text extraction, and AI evaluation using Python, Flask, and LLM APIs, enabling users to optimize resumes for better hiring outcomes. <a href="https://ai-resume-analyzer-one-pink.vercel.app/">https://ai-resume-analyzer-one-pink.vercel.app/</a>	
--	--

<b>JD-2-Q (Job Description → Questions Generator)</b> Developed an AI-powered web application that converts job descriptions into tailored interview questions for focused candidate preparation. Implemented text analysis and LLM-based question generation using Python, Flask, and AI APIs, enabling role-specific technical and HR question creation from raw JD content. <a href="https://jd-2-q-job-description-to-questions.vercel.app/">https://jd-2-q-job-description-to-questions.vercel.app/</a>	
--	--

Skills

---

Python

Strong understanding of Python

MySQL

Manage relational database structures and more.

Git & GitHub

Experienced in committing and managing branches.

Flask

Experience building REST APIs and handling routes

TailwindCSS

Skilled in building fast and responsive UI layouts.

Object-Oriented Programming

Good understanding of classes, objects and inheritance.

Interests

---

Playing Games

Cricket and online games that enhance strategic thinking and teamwork

Soft Skills

---

Communication | Teamwork | Time Management | Leadership

Languages

---

English

Limited working proficiency in speaking, reading, and writing.

Hindi

Native or bilingual proficiency in speaking, reading, and writing.
