Experience

Axilivo Technologies Pvt. Ltd. — Bikaner, Rajasthan
Intern — October 2025 - Present
https://www.axilivo.com/

Education

Shri Jain P.G. College — Bachelor's Degree • 76 %
B.Com (Bachelor of Commerce) — March 2024-Present

Seth Tolaram Bafna Academy — Higher Secondary Education / Schooling • 79 %
Commerce — 2017 – 2019

Projects

Punchdesk Project — October 2025 – Present
Developed **PunchDesk**, a production-ready attendance management backend using **Flask** and **SQLAlchemy**.
Implemented **JWT-based authentication**, multi-role authorization, **mobile & biometric device attendance flows**, centralized exception handling, and clean service-layer architecture.
Focused on scalability, maintainability, and consistent API response standards.

Archery Management System
Developed a full-stack web platform to manage archery students, performance records, and multi-city championships. Implemented student enrollment, score tracking, match scheduling, and leaderboard modules using Python, Flask, MySQL, and responsive web UI. Enabled role-based access for admins, coaches, and students, streamlining tournament operations and athlete performance analysis.

AI PDF Chat Assistant
https://pdf-chat-assistent.vercel.app/
Built an AI-powered web application that allows users to **upload PDFs and interact with them via intelligent Q&A and summaries**. Implemented PDF text extraction, chunking, vector embeddings, and semantic search using **Python, Flask, Gemini LLM, and vector databases**, enabling accurate, context-aware responses strictly based on document content.

AI Resume Analyzer
https://ai-resume-analyzer-one-pink.vercel.app/
Built an AI-powered web application that analyzes resumes to provide smart feedback on skills, keywords, and ATS compatibility. Implemented resume parsing, text extraction, and AI evaluation using Python, Flask, and LLM APIs, enabling users to optimize resumes for better hiring outcomes.

JD-2-Q (Job Description → Questions Generator)
https://jd-2-q-job-description-to-questions.vercel.app/
Developed an AI-powered web application that converts job descriptions into tailored interview questions for focused candidate preparation. Implemented text analysis and LLM-based question generation using Python, Flask, and AI APIs, enabling role-specific technical and HR question creation from raw JD content.

Skills

Python
Strong understanding of Python

Flask
Experience building REST APIs and handling routes

MySQL
Manage relational database structures and more.

TailwindCSS
Skilled in building fast and responsive UI layouts.

Git & GitHub
Experienced in committing and managing branches.

Object-Oriented Programming
Good understanding of classes, objects and inheritance.

Interests

Playing Games
Cricket and online games that enhance strategic thinking and teamwork

Soft Skills

Communication | Teamwork | Time Management | Leadership

Languages

English
Limited working proficiency in speaking, reading, and writing.

Hindi
Native or bilingual proficiency in speaking, reading, and writing.
